

# GOLD NOTE

Italian Music Experience

## TUSCANY MC

### GOLD

Impedance: 4 Ohm

Output level: 0.25mV

Frequency range: 5Hz ~ 55kHz

### RED

Impedance: 20 Ohm

Output level: 0.40mV

Frequency range: 10Hz ~ 50kHz

## MACHIAVELLI MC

### GOLD

Impedance: 80 Ohm

Output level: 1.20mV

Frequency range: 10Hz ~ 40kHz

### RED

Impedance: 130 Ohm

Output level: 2.00mV

Frequency range: 10Hz ~ 40kHz

## DONATELLO MC

### GOLD

Impedance: 40 Ohm

Output level: 0.50mV

Frequency range: 10Hz ~ 40kHz

### RED

Impedance: 140 Ohm

Output level: 1.80mV

Frequency range: 10Hz ~ 35kHz

## VASARI MM

### GOLD

Impedance: 1000 Ohm

Output level: 4.0mV

Frequency range: 15Hz ~ 25kHz

### RED

Impedance: 1000 Ohm

Output level: 4.0mV

Frequency range: 15Hz ~ 25kHz

# Cartridges

Musical Diamonds of an Hi-Fi system

### TUSCANY, the best Italian MC

Tuscany features an extra-thin Micro Ridge diamond tip developed with Namiki, the world leading diamond manufacturer: the special multi-faced cut guarantees the best contact possible with the vinyl groove.

The diamond tip is connected via a telescopic Boron cantilever and a Titanium pipe to achieve excellent rigidity and a perfect connection between the diamond and the silver micro-coils.

The tracking ability of the Tuscany is also improved by the cube design that offers fantastic structural rigidity and gorgeous style, making VTA adjustments very intuitive and precise and its ultra-light body in Aluminium 7050 is injected with fluid polymers to provide a pronounced dampening effect.

### MACHIAVELLI, a refined High-Output MC

Machiavelli features an high-precision Line Contact diamond tip on the Gold model and a Micro Elliptical diamond tip on the Red model, both developed with Namiki.

The diamond tip is connected via ultra-rigid cantilever (Boron in the Gold, Aluminium in the Red) and takes advantage of an elastic suspension in harmonic steel to increase the tracking performances, helped by the rigid designed and structure of the body realised in Aluminium 7050.

The Machiavelli Series feature high-output levels and can be easily matched with any active phono preamp for MM/MC cartridges, without the need of Step-Up transformers.

### DONATELLO, the MC with only 7g of mass

Donatello features a high-precision Micro Elliptical diamond tip developed with Namiki that is mechanically inserted and blocked into a stiffened Aluminium cantilever connected to a Titanium telescopic seat to increase the overall rigidity of the cartridge and provide excellent tracking.

To create Donatello we engineered the best sounding cartridge of its category in a machined Aluminium body so light that it can perform at its best on every tone-arm: weighting only 7 grams and with a beautiful body perfectly damped, this cartridge is an ideal companion for any turntable.

### VASARI, the evolution of the MM

Vasari features an Elliptical diamond tip on the Gold and a Conical diamond tip on the Red, both designed specifically for this cartridge, combining style and technology: the innovative and beautiful design of this cartridge, realised with the help of computer modelling, has been created to achieve the peak performance an MM can deliver.

The result is enhanced rigidity of the cartridge and better tracking performances, achieving wider and smoother bandwidth response.

Its high dampening structure, made of quality materials, and the ultra-rigid Aluminium cantilever make Vasari a superb tracker able to extract all the information from the vinyl groove.
